Subject: [External] Dominion Energy Proposed solar fee schedule

Dear Commissioners,

I urge you to reject the fee structure on residential solar connections proposed by Dominion Energy in favor of a proposal with lower costs to the consumer.

I feel strongly that public policy needs to pave the way for development of renewable energy in our state as one of the best ways to secure our future. Utility companies are in a unique position to facilitate or block this effort. South Carolina is under utilizing its solar potential and missing out on both the job opportunities enjoyed by neighboring sunny states and the opportunity to distribute our energy generation across the state. I urge you to help make solar a more viable part of Dominion Energy's portfolio and South Carolina's energy generation.
